

SND 20

Replacement machine for Schindler 3300

The SND 20 was specifically developed to replace the original FMB130 machine in the Schindler 3300 and enables a smooth 1:1 replacement – without major modifications to the bracket or shaft. Thanks to the adapted belt system, the proven ride quality is maintained while upgrading the technology to the latest standards.

Technical data

Encoder:	ENDAT ECN1313
Protection class:	IP40
Duty cycle:	S5-50%
Brake:	207 VDC
Brake monitoring switch:	Microswitch
Belt:	POLYROPE 33-8x2 (40 kN)

Suitable for

Suitable for Schindler 3300 elevators with FMB130 motor.

- Modernization projects without a machine room
- Systems with limited space in the shaft head
- Operators looking for a manufacturer-independent alternative
- Elevators with requirements for energy-efficient and quiet technology

Machine versions

SND20 – 630.100

Load capacity:	630 kg
Rated speed:	1.0 m/s
