

SRT 30

Replacement for original machine in Schindler SMART MRL

The SRT 30 precisely replaces the original machine in the Schindler SMART MRL without any structural modifications. The identical traction sheave diameter allows seamless integration into the existing setup. This machine meets the highest technical standards – efficient, durable, and future-proof.

Technical data

Encoder:	ENDAT ECN1313
Protection class:	IP40
Duty cycle:	S5-50%
Brake:	207 VDC
Brake monitoring switch:	Microswitch

Suitable for

Schindler Smart MRL elevators with original gearbox

- Modernization projects without a machine room
- Systems with limited space in the shaft head
- Operators seeking an independent alternative to OEM technology
- Elevators requiring energy-efficient and quiet technology

Machine versions

SRT30 – 450.100

Load capacity:	450 kg
Rated speed:	1.0 m/s

SRT30 – 1000.100

Load capacity:	1000 kg
Rated speed:	1.0 m/s

SRT30 – 630.100

Load capacity:	630 kg
Rated speed:	1.0 m/s
